Effective January 1, 2011, Raymond James reports adjusted cost basis of securities currently covered by the Emergency Economic Stabilization Act of 2008 to the IRS on Form 1099-B using the first-in, first-out (FIFO) cost basis accounting method unless otherwise directed by you and your financial advisor at the time of trade or transfer.

For securities that are not covered by the Emergency Economic Stabilization Act of 2008, cost basis information may not be available, may have been estimated by you or your financial advisor, or may have been obtained from third-party sources, and in these instances, Raymond James cannot guarantee its accuracy. Gain or loss information may or may not reflect adjusted cost for:

- Return of principal or capital
- Reinvestment of dividend or capital gain distributions
- Accretion or amortization of bonds bought at a discount or premium

Unrealized gains or losses are not calculated for zero discount coupon bonds.

Gain or loss and average cost will only be reported for securities that have cost basis for all tax lots. To have missing cost basis information added to your account, please contact your financial advisor.

Cost basis information is displayed for your information only and should not be relied upon for tax reporting purposes. Adjustments made to your cost basis throughout the year may cause the information displayed to differ from what is reported to you or the IRS at the end of the year.

Effective January 1, 2011, Raymond James reports adjusted cost basis of securities currently covered by the Emergency Economic Stabilization Act of 2008 to the IRS on Form 1099-B using the first-in, first-out (FIFO) cost basis accounting method unless otherwise directed by you and your financial advisor at the time of trade or transfer.

For securities that are not covered by the Emergency Economic Stabilization Act of 2008, cost basis information may not be available, may have been estimated by you or your financial advisor, or may have been obtained from third-party sources, and in these instances, Raymond James cannot guarantee its accuracy. Gain or loss information may or may not reflect adjusted cost for:

- Return of principal or capital
- Reinvestment of dividend or capital gain distributions
- Accretion or amortization of bonds bought at a discount or premium

Unrealized gains or losses are not calculated for zero discount coupon bonds.

Gain or loss and average cost will only be reported for securities that have cost basis for all tax lots. To have missing cost basis information added to your account, please contact your financial advisor.

Effective January 1, 2011, Raymond James reports adjusted cost basis of securities currently covered by the Emergency Economic Stabilization Act of 2008 to the IRS on Form 1099-B using the first-in, first-out (FIFO) cost basis accounting method unless otherwise directed by you and your financial advisor at the time of trade or transfer.

For securities that are not covered by the Emergency Economic Stabilization Act of 2008, cost basis information may not be available, may have been estimated by you or your financial advisor, or may have been obtained from third-party sources, and in these instances, Raymond James cannot guarantee its accuracy. Gain or loss information may or may not reflect adjusted cost for:

- Return of principal or capital
- Reinvestment of dividend or capital gain distributions
- Accretion or amortization of bonds bought at a discount or premium

Unrealized gains or losses are not calculated for zero discount coupon bonds.

Gain or loss and average cost will only be reported for securities that have cost basis for all tax lots. To have missing cost basis information added to your account, please contact your financial advisor.

Cost basis information is displayed for your information only and should not be relied upon for tax reporting purposes. Adjustments made to your cost basis throughout the year may cause the information displayed to differ from what is reported to you or the IRS at the end of the year.
